19th March, 1963

Mr. Ron B. Schiller,
Box 456,
Monmouth Beach,
New Jersey
U. S.A.

Dear Mr. Schiller,

Receipt of your letter of March 12th, 1963 is acknowledged and we are pleased to confirm that you did indeed receive Radio Trinidad at the times quoted.

Radio Trinidad operates on an assigned frequency of 730 Kc/s in the Broadcast Band with a power of 20Kw, consisting of two Redifon G162 transmitters operated in parallel via a "T" network and feeding a "T" antenna 180' in height. We also operate on 95.1 Mc/s. in the FM band carrying the identical programme.

Our M.W. transmitters are located at Caroni, about 10 miles from Port of Spain, the capital of Trinidad, and the FM is sited on Cumberland Hill 1,080 feet above sea level just outside the city.

We wish you lots of luck in your Dx hunt.

Yours faithfully,
TRINIDAD BROADCASTING CO., LTD.

T.A.S. Bridgewater,
Engineer-in-Charge.
